

State Route 43 Flint Avenue Intersection Improvements Kings County

Project Purpose:

The purpose of this project is to improve safety and traffic operations at the intersection of State Route 43 and Flint Avenue in Kings County. This intersection is a primary route for the residents of the City of Hanford and near by communities. This project will improve safety for vehicles crossing the intersection.

Project Description:

This project is located in Kings County on State Route 43, near the City of Hanford at the intersection of State Route 43 and Flint Avenue. This project will install traffic signals, constructing turn lanes and widening the existing intersection to accommodate Surface Transportation Assistance Act (STAA) truck turning standards.

Construction Cost: \$1.4 Million

Begin Construction: May 2007

End Construction: September 2007

Funding Sources: State Highway Operation and Protection Program (SHOPP), Kings County

Contractor: Granite Construction
